

Make Your Own Snow

Make your very own snow to play with no matter what kind of weather we're having! You'll need materials you most likely have around your home! One great thing about this snow is that it doesn't have to be winter to play with it!

Materials

- Baking Soda
- Shaving Cream (or Conditioner)
- A Container for Mixing

Instructions

Before you begin gather all of your materials and decide whether you'll use shaving cream or conditioner. Both shaving cream and conditioner will work just as well-so use whatever you have on hand!

1

Start by scooping out your baking soda. I start with a $\frac{1}{2}$ cup, but this will depend on how much snow you want to make!

2

Next add shaving cream (or hair conditioner) in small amounts. Remember that shaving cream expands as it comes out of the can!

3

Carefully mix your shaving cream (or hair conditioner) in. You are looking for a light and powdery texture-just like snow! It will leave little/no residue on your hand when it is ready. Put it in the fridge or freezer to make it even more snow like!
